Wire Management System

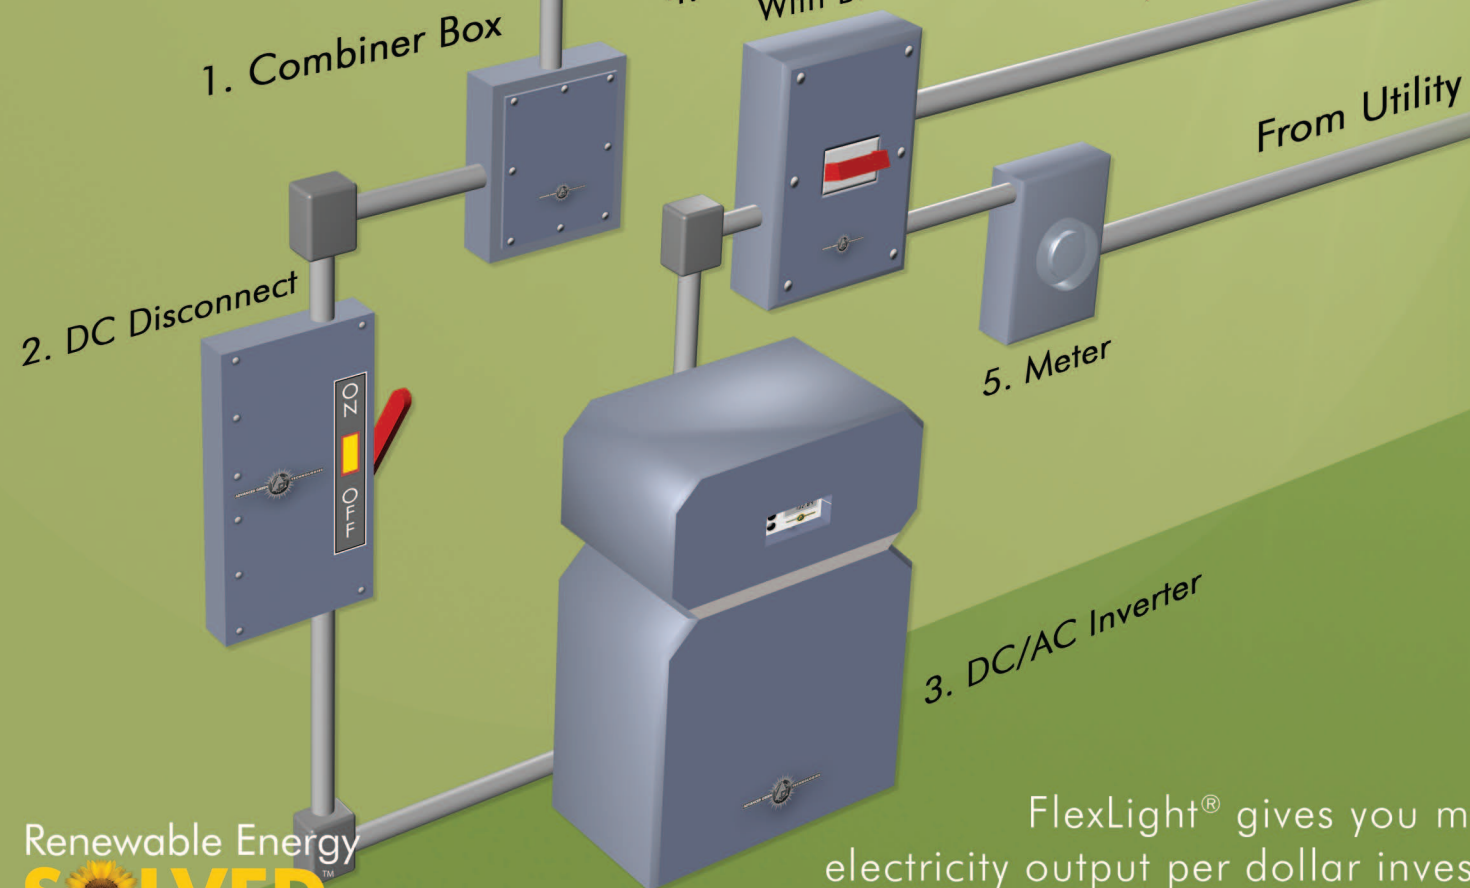

FlexLight® PV Laminate

FlexLight®, a triple junction solar product, captures the full spectrum of Sunlight, making it one of the most efficient photovoltaic products.

- Adheres directly to the roof without penetrations - approved for roofing manufacturer warranties
- Approved by state revenue departments for tax incentives
- Flexible and lightweight - Virtually unbreakable, weighs only one pound per square foot, compared to five pounds per square foot for a traditional solar system
- Triple Junction Technology - captures the complete solar spectrum more efficiently
- Generates electricity at low light levels - produces more electricity per watt than any other system
- Bypass diode across every solar cell - minimize power loss when shaded
- Wire Management System - building code compliant, and provides clean roof appearance
- 25 Year warranty on power output and roof bonding

FlexLight® gives you more electricity output per dollar invested than any other photovoltaic system.
