Re: Ontario Rooftop Solar Installations

Michael:

I would like to extend a personal note of appreciation for the work that you and your team have done on the installation of our rooftop solar portfolio in Ontario. To date, you have installed over two megawatts of solar panels across four commercial buildings in the province, and have made it possible for us to rank in the top three solar developers in the province with respect to feed-in tariff projects online.

When you approached us in July, 2010, you were competing directly with over a dozen construction management firms. To say that you were underdogs in winning the bid is a pretty big understatement. From that day forward, you and your team impressed us with your willingness and ability to execute on solar projects, tackle the various legislative and structural issues associated with the projects, and achieve commercial operation in a timely and quality manner.

Our team at Bright Power is excited to partner with you on the next set of 11 solar rooftop projects, commencing in the fourth quarter of this year. I congratulate you on your outstanding performance and look forward to a long and strong developer / installer relationship between our companies.

Sincerely,

A handwritten signature in black ink, appearing to read "Andrew Knapp".
