E&E McLaughlin is pleased to recommend Advanced Green Technologies (AGT Solar). AGT Solar was hired to design, procure, and construct five solar PV arrays on buildings we own in Ontario, Canada; totaling 2.56 megawatts, under the Ontario Power Authority's (OPA) Feed-in-Tariff ("FIT") program in 2011.

To date, all five projects have been successfully installed; and we are happy to say that AGT Solar completed the projects on schedule without disrupting our core business operation.

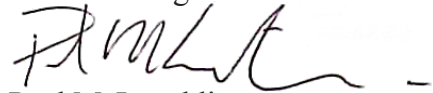

Some of the projects had complex structural and rooftop load concerns; where AGT's roofing and construction experience was critical to uncovering the solutions we needed to keep the project moving forward in a timely manner.

AGT Solar's communication on the project was excellent. Their team provided us with updates when we expect them and responses when we needed them, effectively eliminating unwanted surprises.

We are happy and satisfied with AGT's work and will consider working with them on future projects.

Sincerely,

E&E McLaughlin Ltd.

Paul McLaughlin
