To Whom It May Concern,

Beginning in 2010, SolarShare engaged Advanced Green Technologies (AGT) to construct 17 microFIT projects, then a 438kW rooftop solar PV system in Mississauga and finally a 140kW rooftop system in St. Catharines.

The construction of these projects was very trouble-free and when a few inevitable issues arose, the owners and staff at AGT were very reasonable and accommodating to work with and solutions were developed collaboratively. Overall we are very satisfied with AGT, finding them to be professional, prompt, pleasant to work with, the installation was of high quality and project completion was on time.

I won't hesitate to work with them again and would happily recommend AGT Solar to anyone looking to install a commercial rooftop solar energy system.

Sincerely,

Michael Brigham  
President
